

WHY RE-ELECT BOB DIAZ

To The Township Committee?

(BOB DIAZ - THE ONE WITH THE GLASSES!!)

Because I want what you do – a home in the country where it is clean, safe, quiet and peaceful - a great place to live and to raise children. My wife Barbara and I, the parents of four, and grandparents of 7, moved to South Harrison 20 years ago as it was just such a place. I want it remain that way.

We have seen many changes over the years, and there are sure to be more. The pressure to develop – to become a suburb full of “cookie cutter houses” on 1/4 acre lots, with Fast Food outlets, gas-stations, crime and other “city” issues is always present. While growth is inevitable, it can be on our terms.

Those you elect must share your values and work to shape growth in the way you desire. Your choice for Committee-man must want to keep the rural, small town character you came here for, and work to improve the Township’s facilities and services - all while managing the ever increasing costs.

You need a committeeman who understands this and who won't try to commercialize the lot next door. You want a committeeman who has proven their interest in the township by their actions over many years, not just over one, currently popular, issue.

Experience counts. I have not just lived here, I have gotten involved - as the president of Citizens Against Landfills; as Township Zoning Officer; as a Planning Board member; as a Committeeman in 1988 and being elected to my current term in 1999. I have been an active member of Unity Service Ambulance for over 10 years, and Captain, Treasurer, or both for almost as long.

We've come far in the past few years: a "Dry Pipe" for drawing fire-fighting water from the lake is now installed, a new emergency generator is almost a reality; the park has been enlarged, with walking paths, benches and other "adult" amenities added. Our Police have the skills and the equipment to protect them and us. We purchased much need equipment and a new truck for the Road Department. The list goes on. For a small town, we are doing pretty well.

Taxes, however, have not improved. We have maintained the "local government" tax – that which runs the township – to under 4 cents of your tax dollar. The costs of school and county taxes – costs we at the Township level don't control - have soared to over 96. We are continuing to work on finding a solution to this burden.

Choose to keep moving the way YOU want to. Re-Elect me – Bob Diaz – to Township Committee.
